The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 2.2 in increments of 0.1. The x-axis ranges from -10 to 10. The blue line remains consistently low, fluctuating between approximately 0.1 and 0.15 across the entire range. There are no significant peaks or troughs, indicating a very stable and low-value function.

The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 2.1 in increments of 0.1. The x-axis ranges from -10 to 10. The blue line remains consistently low, fluctuating between approximately 0.1 and 0.15 across the entire range. There is a very slight downward trend as x increases from -10 to 10.

The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 2 in increments of 0.1. The x-axis ranges from -10 to 10. The blue line remains consistently low, fluctuating between approximately 0.1 and 0.15 across the entire range. There are no significant peaks or troughs, indicating a very stable and low-value function.

The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 1.9 in increments of 0.1. The x-axis is unlabeled but has a range from 0 to 100. The blue line starts at approximately 0.15, remains relatively flat with minor fluctuations, and ends at approximately 0.1. There is a very slight downward trend over the entire range.

The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 1.8 in increments of 0.1. The x-axis is unlabeled but spans from 0 to 100. The blue line starts at approximately 0.15, remains relatively flat with minor fluctuations, and ends at approximately 0.1. There is a very slight downward trend over the entire range.

The graph displays a single data series represented by a blue line. The x-axis ranges from 0 to 100, and the y-axis ranges from 0 to 1.7. The line remains consistently low, hovering around the 0.15 mark on the y-axis. There are minor fluctuations, with slight peaks around x=10 and x=25, and a very slight dip around x=50. The overall trend is flat and stable.

The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 1.6 in increments of 0.1. The x-axis ranges from -10 to 10, with major grid lines every 1 unit and minor grid lines every 0.2 units. The blue line starts at approximately 0.15 at x = -10, remains relatively flat with minor fluctuations, and ends at approximately 0.1 at x = 10. There is no significant trend or change in the data across the x-axis range.

The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 1.5 in increments of 0.1. The x-axis ranges from -10 to 10. The blue line remains consistently low, fluctuating between approximately 0.1 and 0.15 across the entire range. There are no significant peaks or troughs, indicating a very stable and low-value function.

The graph displays a single data series represented by a blue line. The y-axis is labeled from 0 to 1.4 in increments of 0.1. The x-axis is unlabeled but spans from 0 to 100. The blue line starts at approximately 0.15, remains relatively flat with minor fluctuations, and ends at approximately 0.1. There is a slight downward trend in the latter half of the graph.

A line graph on a grid. The vertical axis (y-axis) is labeled from 0 to 1.2 in increments of 0.1. The horizontal axis (x-axis) is unlabeled but has a grid of 100 units. A blue line represents the data, starting at approximately 0.15 on the y-axis and fluctuating slightly as it moves across the x-axis. A vertical black line is drawn at the 50th unit on the x-axis. The background of the graph is light gray, and the grid lines are light blue.

The graph displays a blue line on a grid. The y-axis is labeled from 0 to 1.1 in increments of 0.1. The x-axis has a vertical line at the center. The blue line starts at approximately 0.18 on the y-axis and gradually decreases to about 0.11 by the end of the x-axis.

The graph displays a blue line on a grid. The y-axis is labeled from 0 to 1 in increments of 0.1. The x-axis is unlabeled but has a vertical line at the center. The blue line starts at approximately 0.15 on the y-axis and remains relatively flat, ending at approximately 0.1. The line shows minor fluctuations throughout its length.

The graph displays the error rate over 100,000 iterations. The y-axis, labeled 'Error', ranges from 0 to 0.9. The x-axis, labeled 'Iteration', ranges from 0 to 100,000. The error rate begins at approximately 0.15 and shows a gradual, noisy decline, reaching a plateau of about 0.10 after 100,000 iterations.

Iteration	Error
0	0.15
10,000	0.14
20,000	0.13
30,000	0.12
40,000	0.11
50,000	0.10
60,000	0.09
70,000	0.08
80,000	0.07
90,000	0.06
100,000	0.10

The graph displays the function $f(x) = 0.15 \cdot \exp(-0.0001 \cdot x)$ for $x \in [0, 10000]$. The x-axis is labeled from 0 to 10000 in increments of 1000. The y-axis is labeled from 0 to 0.8 in increments of 0.1. The function starts at $f(0) = 0.15$ and decreases exponentially, reaching approximately 0.1 at $x = 10000$. The curve is smooth and continuous, with a slight oscillation visible in the initial part of the plot.

The graph displays a blue line on a grid. The y-axis is labeled from 0 to 0.8 in increments of 0.1. The x-axis is unlabeled but has a vertical line at the center. The blue line starts at approximately 0.15 on the y-axis and remains relatively flat, ending at approximately 0.1. The line shows minor fluctuations throughout its length.

The graph displays a blue line on a grid. The vertical axis (y-axis) is labeled with values 0, 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, and 0.7. The horizontal axis (x-axis) is marked by a vertical black line at the center of the grid. The blue line starts at approximately 0.15 on the y-axis, remains relatively flat with minor fluctuations, and ends at approximately 0.1. The line is slightly higher on the left side of the vertical black line and slightly lower on the right side.

The graph illustrates the convergence of the cost function over 100 iterations. The y-axis, labeled 'Cost Function Value', ranges from 0 to 0.6 with major grid lines every 0.1 units. The x-axis, labeled 'Iterations', ranges from 0 to 100 with major grid lines every 10 units. A blue line represents the cost function, which starts at approximately 0.18 at iteration 0 and decreases to about 0.11 at iteration 100. The line shows minor fluctuations throughout the iterations.

Iterations	Cost Function Value
0	0.18
10	0.17
20	0.16
30	0.15

50	0.13
60	0.12
70	0.11
80	0.10
90	0.09
100	0.11

The graph illustrates the convergence of the error rate over 100,000 iterations. The error rate begins at approximately 0.15 and shows a gradual, noisy decrease, reaching a plateau of about 0.10 after 100,000 iterations. A vertical line at 100,000 iterations marks the end of the training process.

90	0.12
100	0.12

The graph illustrates the training process of a model. The x-axis represents the number of iterations, ranging from 0 to 1000. The y-axis represents the loss function value, ranging from 0 to 0.3. The loss starts at approximately 0.15 and decreases steadily, reaching about 0.10 after 1000 iterations. The graph is divided into two sections by a vertical line at iteration 500, likely indicating a change in the training process or a comparison between two different models or configurations.
